

SLCN Training

Supporting children and young adults with SLCN - Classroom Strategies

Developmental Language Disorder (DLD), a subset of SLCN, is the term used to diagnose children when they fail to acquire their own language for no obvious reason.

The Moor House Research & Training Institute is offering new courses designed to help schools and teachers support pupils with DLD

“

“2 children in every classroom of 30 will experience DLD severe enough to hinder academic progress.”

(Norbury et al, 2016)

1 hour course: An Introduction

- Developmental Language Disorder (DLD) - What every class teacher needs to know!

2 hour course: Classroom Support

- Developmental Language Disorder (DLD) - What every class teacher needs to know!
- How to support pupils with DLD in the classroom - identifying strategies and resources that can be used by teachers and teaching assistants.

3 hour course: Classroom Support

- Developmental Language Disorder (DLD) - What every class teacher needs to know!
- How to support pupils with DLD in the classroom - identifying strategies and resources that can be used by teachers and teaching assistants.
- Exploring activities that can be used in class to support pupils who experience difficulties with word-finding, reading comprehension, narrative skills, vocabulary and work knowledge, grammar, phonological awareness and literacy skills.*

*This part of the course can be tailored to the needs of the individual school/group. Schools can book the 3 hour or a full day course, delivered by a range of professionals including a specialist teacher (SLCN), highly specialist speech and language therapist and/or highly specialist occupational therapist.

These courses are run by **Sue Marr**, a specialist SLCN teacher from Moor House. Sue has extensive knowledge of devising and delivering a mainstream curriculum that has been highly differentiated for the language needs of the pupils in her class. She has worked alongside speech and language therapists for many years, ensuring that speech therapy can be integrated using a range of specialist systems.
